EQUIPMENT DESCRIPTION:

Ingenico eN-Touch 3100 Secure Payment Acceptance Using the Power and Speed of the Internet

The Ingenico eN-Touch 3100 is designed for fast transaction authorization and optimal customer service. A large, graphically enhanced touch screen, quick integrated printer, Ethernet port, 32-bit processor and powerful 33.6kbps modem make it the perfect terminal for fast transaction authorization.

Fast Integrated Printer

3" wide paper and large print make it easy for customers to read receipts 12 lines per second, prints the average receipt in just over 1 second. Clam shell paper loading makes it simple to change paper.

Accurate Bi-directional MSR

Long card swipe path increases first pass magnetic stripe read accuracy. Ergonomic "ski-jump" design reduces card bounce.

Cost Effective, Fast and Secure Transaction Authorization

eN-Touch 3100's Ethernet port connects directly to the Internet via broadband, enabling transactions to be authorized in 2 to 3 seconds. Automatic switch to Dial backup via the eN-Touch 3100's 33.6 kbps modem in the event that broadband is unavailable. Transactions are encrypted using SSL
