CREDIT CARD PROCESSING EQUIPMENT

Business Type: Retail, Mail / Phone Order & More

DASSAULT TALENTO

OVERVIEW

The Talento terminal answers all EFT needs for the Credit only environment. Support of EZ WARE features exists for all Credit functionality. The Talento device provides a terminal and printer, all in one small footprint.

This device can come in several memory models as functionality requires. Smart Card support can also be available in this terminal.

EQUIPMENT DESCRIPTION

The Talento T-One, point-of-sale terminal is very user-friendly and is designed to allow merchants to process credit and debit card transactions easily and without the need for extensive training. Precise and easy-to-understand user prompts and messages are key features of this terminal.

Another outstanding feature of the Talento is its ability to support up to eight Merchant Files on one device. This Multi-Merchant feature can be very useful in businesses such as doctors' offices and hair salons where several independent professionals work together in one office. It can be useful anytime a business has more than one merchant account which needs to process credit card transactions separately. The Talento unit is available for immediate deployment for retail or restaurant merchants.
